

## Spectrum Management Training Service

**Spectrocan** has been a committed and strong proponent of developing long-term human resource development programs within the Regulator Departments to ensure that their personnel acquire and develop needed skills at all levels. Extensive effort has gone into identifying the appropriate strategy and developing a curriculum to satisfy a variety of training needs in all aspects of spectrum management.

### Centers of Excellence

**Spectrocan** is an active participant in the ITU African Centres of Excellence, a program that lends assistance to countries in need to develop and strengthen their skills and knowledge to help with the transition to a new wireless environment.

The centers operate from facilities in Nairobi, Kenya and Dakar, Senegal, where the majority of courses and seminars take place.

**Spectrocan** has contributed with numerous training courses and lectures on topics such as:

- ✦ Automation of spectrum management activities
- ✦ Spectrum management and monitoring integration
- ✦ Resolution of interference
- ✦ Application of GIS in spectrum management
- ✦ Frequency pricing
- ✦ Spectrum management outsourcing
